

# W-494-A

Early Maturity

Warner Seeds, Inc.

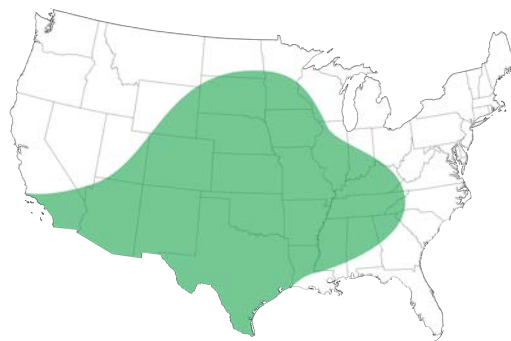

**Management Notes:** W-494-A is an early hybrid that best performs in a short season or double-crop situation. Good dry-down qualities make harvest easy and predictable. W-494-A can produce high yields quickly.

**Strengths & Weaknesses:** W-494-A emerges quickly and is well adapted to cool soils. It has excellent yield for this maturity class. It is adapted to all sorghum growing regions. It is a short plant with some height irregularity.

## Plant Traits:

Days to Maturity	90-100
Days to Mid-bloom	45-50
Plant Height	36"-48"
Head Exertion	4"-7"
Head Type	Semi-compact
Grain Color	Red
Plant Color	Purple

## Area of Adaptation

## Agronomic Traits:

Yield for Maturity	9
Uniformity	6
Seedling Vigor	8
Cool Soil Germ	9
Drought Tolerance	7
Lodging Resistance	7
Grain Weathering	8

## Disease & Insect Traits:

MDMV	MT
Loose Head Smut	MT
DM Race 1 &2	S
Fusarium	S
Charcoal Rot	MT
Greenbug Biotype C	HR
Greenbug Biotype E	S

Notes:

All ratings are general and based on current information. 1 = Poor, 10 = Excellent. HR = Highly Resistant, T = Tolerant, MT = Moderately Tolerant, HT= Highly Tolerant, S = Susceptible
