

W-638-W

Medium Maturity

Warner Seeds, Inc.

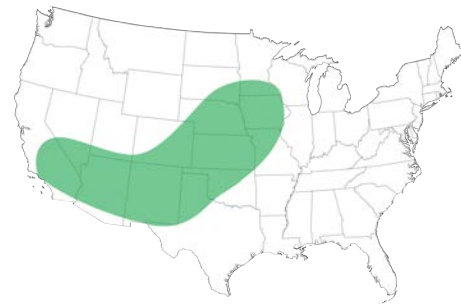

Management Notes: W-638-W is a medium maturity hybrid with excellent visual appeal and outstanding yield potential. This hybrid has excellent weathering resistance and responds well to good management practices.

Strengths & Weaknesses: W-638-W has good drought tolerance and excellent drydown. It has average standability and no greenbug resistance. W-638-W is widely adapted from Central Texas to the Midwest.

Plant Traits:

Days to Maturity	100-110
Days to Mid-bloom	50-55
Plant Height	48"-56"
Head Exertion	4"-7"
Head Type	Semi-open
Grain Color	Cream
Plant Color	Purple

Area of Adaptation

Agronomic Traits:

Yield for Maturity	8
Uniformity	7
Seedling Vigor	8
Cool Soil Germ	8
Drought Tolerance	8
Lodging Resistance	6
Grain Weathering	6

Disease & Insect Traits:

MDMV	MT
Loose Head Smut	MT
DM Race 1 &2	HT
Fusarium	HT
Charcoal Rot	MT
Greenbug Biotype C	S
Greenbug Biotype E	S

Notes:

All ratings are general and based on current information. 1 = Poor, 10 = Excellent. HR = Highly Resistant, T = Tolerant, MT = Moderately Tolerant, HT= Highly Tolerant, S = Susceptible

Grain Sorghum
