

# W-7051

Medium - Late Maturity

Warner Seeds, Inc.

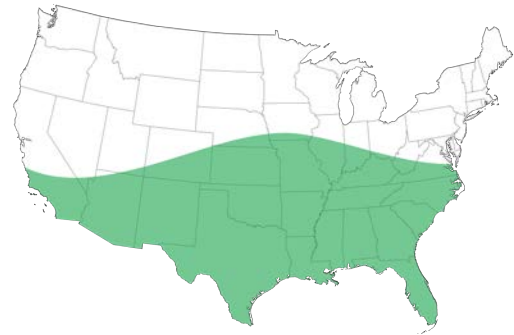

**Management Notes:** W-7051 is a medium-late hybrid. It is a tall hybrid with excellent visual appeal and an excellent disease package. W-7051 should be planted in areas of higher rainfall or under full irrigation. Post-harvest, the stover can be grazed or baled.

**Strengths & Weaknesses:** W-7051 has high test weight, good head exertion, excellent disease tolerance and good staygreen. This is not a dryland hybrid.

## Plant Traits:

Days to Maturity	110-115
Days to Mid-bloom	55-60
Plant Height	62"-66"
Head Exertion	7"-8"
Head Type	Semi-open
Grain Color	Red

## Area of Adaptation

## Agronomic Traits:

Yield for Maturity	8
Uniformity	8
Seedling Vigor	8
Cool Soil Germ	8
Drought Tolerance	7
Lodging Resistance	7
Grain Weathering	8

## Disease & Insect Traits:

MDMV	T
Loose Head Smut	MT
DM Race 1 & 2	MT
Fusarium	T
Charcoal Rot	T
Greenbug Biotype C	MT
Greenbug Blotype E	MT

Notes:

All ratings are general and based on current information. 1 = Poor, 10 = Excellent. HR = Highly Resistant, T = Tolerant, MT = Moderately Tolerant, HT = Highly Tolerant, S = Susceptible
