APHID
RESISTANCE IN
SORGHUM

W-5501

- » Excellent yield potential for double crop
- » Very uniform with very good eye appeal
- » Short statured plant with excellent stalk strength
- » Very good standability

Management Tips

- ✓ One of earliest hybrids in the lineup suitable for double cropping
- ✓ Adapted to conditions from Texas to South Dakota
- ✓ Short in stature with excellent stalk strength for tough dryland conditions

PLANT CHARACTERISTICS		DISEASE RESISTANCE	
Area of Adaptation	1-5	Sugar Cane Aphid Tolerance	Susceptible
Relative Maturity	Early	Greenbug Resistance (C)	Highly Resistant
Days to Mid-Bloom	50-55	Greenbug Resistance (E)	-
Days to Maturity	90-95	Maize Dwarf Mosaic	Moderately Tolerant
Grain Color	Bronze	Head Smut	Moderately Tolerant
Head Type	Semi-Open	Downey Mildew	Tolerant
Plant Color	Purple	Fusarium	-
Plant Height (in)	28-34	Charcoal Rot	Moderately Tolerant
Head Exertion (in)	4-7		
Staygreen	Yes		

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	9	DROUGHT TOLERANCE	8
SEEDLING VIGOR	6	LODGING RESISTANCE	7
COLD SOIL VIGOR	6	WEATHERING RESISTANCE	6

W-5701

- » Excellent yield potential
- » Very uniform with very good eye appeal
- » Great overall plant health
- » Very good standability

Management Tips

- ✓ Performs well on both dryland and irrigated fields
- ✓ Early maturing hybrid that can yield with the later maturing hybrids
- ✓ Adapted to conditions from South Texas to the Midwest

PLANT CHARACTERISTICS		DISEASE RESISTANCE	
Area of Adaptation	1-5	Sugar Cane Aphid Tolerance	Susceptible
Relative Maturity	Early	Greenbug Resistance (C)	-
Days to Mid-Bloom	55-60	Greenbug Resistance (E)	-
Days to Maturity	100-105	Maize Dwarf Mosaic	-
Grain Color	Red	Head Smut	-
Head Type	Semi-Compact	Downey Mildew	-
Plant Color	Tan	Fusarium	-
Plant Height (in)	36-44	Charcoal Rot	-
Head Exertion (in)	8-9		
Staygreen	Yes		

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	8	DROUGHT TOLERANCE	7
SEEDLING VIGOR	8	LODGING RESISTANCE	8
COLD SOIL VIGOR	6	WEATHERING RESISTANCE	6

W-5711

- » Excellent yield for maturity
- » Tolerant to Sugar Cane Aphids
- » Great overall plant health and uniformity
- » Very good drought tolerance and standability

Management Tips

- ✓ Performs well on both dryland and irrigated fields
- ✓ Early maturing hybrid that can yield with the later maturing hybrids
- ✓ Adapted to conditions from South Texas to the Midwest
- ✓ Very good standability

PLANT CHARACTERISTICS		DISEASE RESISTANCE	
Area of Adaptation	1-5	Sugar Cane Aphid Tolerance	Tolerant
Relative Maturity	Early	Greenbug Resistance (C)	-
Days to Mid-Bloom	55-60	Greenbug Resistance (E)	-
Days to Maturity	100-105	Maize Dwarf Mosaic	-
Grain Color	Bronze	Head Smut	-
Head Type	Semi-Open	Downey Mildew	-
Plant Color	Purple	Fusarium	-
Plant Height (in)	32-40	Charcoal Rot	-
Head Exertion (in)	6-8		
Staygreen	Yes		

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	8	DROUGHT TOLERANCE	8
SEEDLING VIGOR	8	LODGING RESISTANCE	8
COLD SOIL VIGOR	6	WEATHERING RESISTANCE	7

W-5901

- » Excellent yield potential
- » Very uniform with very good eye appeal
- » Great overall plant health
- » Very good standability

Management Tips

- ✓ Performs well on both dryland and irrigated fields
- ✓ Early maturing hybrid that can yield with the later maturing hybrids
- ✓ Adapted to conditions from South Texas to the Midwest
- ✓ Very good standability

PLANT CHARACTERISTICS		DISEASE RESISTANCE	
Area of Adaptation	1-5	Sugar Cane Aphid Tolerance	Susceptible

Days to Mid-Bloom	55-60	Greenbug Resistance (E)	-
Days to Maturity	100-105	Maize Dwarf Mosaic	-
Grain Color	Red	Head Smut	-
Head Type	Compact	Downey Mildew	-
Plant Color	Tan	Fusarium	-
Plant Height (in)	38-46	Charcoal Rot	-
Head Exertion (in)	8-9		
Staygreen	Yes		

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	7	DROUGHT TOLERANCE	7
SEEDLING VIGOR	7	LODGING RESISTANCE	8
COLD SOIL VIGOR	6	WEATHERING RESISTANCE	7

W-5911

- » Excellent yield potential
- » Very uniform with very good eye appeal
- » Highly tolerant to Sugar Cane Aphids
- » Excellent standability

Management Tips

- ✓ Widely adaptable from South Texas to Southern Nebraska
- ✓ Performs at high levels on good conditions but also on tough dryland conditions
- ✓ Plant in areas where Sugar Cane Aphid infestations are likely

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Early
Days to Mid-Bloom	60-62
Days to Maturity	105-110
Grain Color	Bronze
Head Type	Semi-Compact
Plant Color	R
Plant Height (in)	50-54
Head Exertion (in)	4-8
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Very Tolerant
Greenbug Resistance (C)	Moderately Tolerant
Greenbug Resistance (E)	Susceptible
Maize Dwarf Mosaic	Highly Tolerant
Head Smut	Highly Tolerant
Downey Mildew	Tolerant
Fusarium	Highly Tolerant
Charcoal Rot	Highly Resistant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	9	DROUGHT TOLERANCE	9
SEEDLING VIGOR	8	LODGING RESISTANCE	9
COLD SOIL VIGOR	8	WEATHERING RESISTANCE	7

W-5916 New

- » Outstanding yield potential
- » Very uniform with very good eye appeal and bright red grain color
- » Tolerant to Sugar Cane Aphids
- » Excellent head exertion and stalk strength

MODERATE RESISTANCE

Management Tips

- ✓ New for 2021 Season
- ✓ Widely adaptable from South Texas to Southern Nebraska
- ✓ Performs at high levels on good conditions but also on tough dryland conditions
- ✓ Plant in areas where Sugar Cane Aphid infestations are likely

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Early
Days to Mid-Bloom	60-62
Days to Maturity	105-110
Grain Color	Red
Head Type	Semi-Compact
Plant Color	Purple
Plant Height (in)	50-54
Head Exertion (in)	4-8
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Tolerant
Greenbug Resistance (C)	-
Greenbug Resistance (E)	-
Maize Dwarf Mosaic	-
Head Smut	-
Downey Mildew	-
Fusarium	-
Charcoal Rot	Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	9	DROUGHT TOLERANCE	8
SEEDLING VIGOR	8	LODGING RESISTANCE	9
COLD SOIL VIGOR	8	WEATHERING RESISTANCE	8

W-5921

- » Excellent yield for maturity
- » Tolerant to Sugar Cane Aphids
- » Great overall plant health and uniformity
- » Very good drought tolerance and standability

Management Tips

- ✓ Widely adaptable from South Texas to Southern Nebraska
- ✓ Performs best under good conditions but also works well on favorable dryland conditions
- ✓ Plant in areas where Sugar Cane Aphid infestations are likely

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Early
Days to Mid-Bloom	60-62
Days to Maturity	105-110
Grain Color	Bronze
Head Type	Semi-Open
Plant Color	R
Plant Height (in)	32-40
Head Exertion (in)	6-8
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Very Tolerant
Greenbug Resistance (C)	-
Greenbug Resistance (E)	-
Maize Dwarf Mosaic	-
Head Smut	-
Downey Mildew	-
Fusarium	-
Charcoal Rot	Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	8	DROUGHT TOLERANCE	8
SEEDLING VIGOR	8	LODGING RESISTANCE	8
COLD SOIL VIGOR	6	WEATHERING RESISTANCE	7

W-625Y

- » Our most popular and consistent medium maturity variety
- » Moderately tolerant to Sugar Cane Aphids
- » Outstanding drought tolerance and staygreen
- » Very good emergence and early vigor
- » Excellent standability and test weight

MODERATE RESISTANCE

Management Tips

- ✓ Performs well on both dryland and irrigated fields
- ✓ Adapted to conditions from Central Texas to the Midwest
- ✓ Plant where Sugar Cane Aphid infestations are possible. Moderate tolerance

PLANT CHARACTERISTICS

Area of Adaptation	1-4
Relative Maturity	Medium
Days to Mid-Bloom	60-65
Days to Maturity	110-115
Grain Color	Yellow
Head Type	Semi-Open
Plant Color	Purple
Plant Height (in)	42-48
Head Exertion (in)	4-8
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Moderately Tolerant
Greenbug Resistance (C)	Tolerant
Greenbug Resistance (E)	Moderately Tolerant
Maize Dwarf Mosaic	Highly Tolerant
Head Smut	Highly Tolerant
Downey Mildew	Tolerant
Fusarium	Highly Tolerant
Charcoal Rot	Highly Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	7	DROUGHT TOLERANCE	9
SEEDLING VIGOR	8	LODGING RESISTANCE	9
COLD SOIL VIGOR	8	WEATHERING RESISTANCE	7

W-844E

- » Excellent yield potential and test weight
- » Highly tolerant to Sugar Cane Aphids
- » Highly resistant to biotype C and E greenbugs
- » Excellent weathering resistance
- » Very good disease resistance

Management Tips

- ✓ Best results when planted in warmer soils
- ✓ Adapted to conditions from deep South Texas to Nebraska
- ✓ Plant in areas where Sugar Cane Aphid infestations are likely

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Full
Days to Mid-Bloom	65-70
Days to Maturity	110-115
Grain Color	Red
Head Type	Semi-Compact
Plant Color	Purple
Plant Height (in)	40-45
Head Exertion (in)	3-6
Staygreen	No

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Very Tolerant
Greenbug Resistance (C)	Highly Tolerant
Greenbug Resistance (E)	Highly Tolerant
Maize Dwarf Mosaic	Tolerant
Head Smut	Highly Tolerant
Downey Mildew	Highly Tolerant
Fusarium	Moderately Tolerant
Charcoal Rot	Moderately Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	7
SEEDLING VIGOR	8
COLD SOIL VIGOR	7

DROUGHT TOLERANCE	8
LODGING RESISTANCE	7
WEATHERING RESISTANCE	9

W-7051

- » Tall, very attractive hybrid
- » Excellent yield potential
- » Very good standability
- » Good disease resistance
- » Excellent resistance to Sugar Cane Aphids

Management Tips

- ✓ Can be planted from South Texas to Kansas
- ✓ Tall plant offers grazing options after grain harvest
- ✓ Excellent choice for an early sorghum silage with exceptional resistance to Sugar Cane Aphids
- ✓ Should only be planted in higher rainfall or irrigated conditions

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Full
Days to Mid-Bloom	65-70
Days to Maturity	110-115
Grain Color	Red
Head Type	Semi-Open
Plant Color	Purple
Plant Height (in)	62-66
Head Exertion (in)	8-9
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Very Tolerant
Greenbug Resistance (C)	Moderately Tolerant
Greenbug Resistance (E)	Moderately Tolerant
Maize Dwarf Mosaic	Tolerant
Head Smut	Moderately Tolerant
Downey Mildew	Moderately Tolerant
Fusarium	Tolerant
Charcoal Rot	Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	8
SEEDLING VIGOR	8
COLD SOIL VIGOR	8

DROUGHT TOLERANCE	7
LODGING RESISTANCE	7
WEATHERING RESISTANCE	8

W-7506 NEW

- » Very attractive and showy hybrid
- » Excellent yield potential especially Northern Kansas
- » Very good standability
- » Good disease resistance
- » Good resistance to Sugar Cane Aphid

Management Tips

- ✓ Can be planted from South Texas to Kansas
- ✓ Plant where Sugar Cane Aphid infestations are possible. Moderate tolerance
- ✓ Likes to be planted in higher rainfall areas or under irrigation

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Full
Days to Mid-Bloom	62-65
Days to Maturity	110-115
Grain Color	Red
Head Type	Semi-Compact
Plant Color	Purple
Plant Height (in)	54-56
Head Exertion (in)	4-8
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Tolerant
Greenbug Resistance (C)	-
Greenbug Resistance (E)	-
Maize Dwarf Mosaic	-
Head Smut	-
Downey Mildew	-
Fusarium	-
Charcoal Rot	Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	9
SEEDLING VIGOR	8
COLD SOIL VIGOR	8

DROUGHT TOLERANCE	7
LODGING RESISTANCE	8
WEATHERING RESISTANCE	8

W-7706W

- » Tall, white grain, very attractive hybrid
- » High yield potential especially as a sorghum silage hybrid
- » Very good standability
- » Excellent resistance to Sugar Cane Aphids

Management Tips

- ✓ Should be planted in high rainfall or irrigated conditions
- ✓ Extremely tall hybrid should be used for silage
- ✓ Use where Sugar Cane Aphids are a concern

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Full
Days to Mid-Bloom	65-70
Days to Maturity	110-115
Grain Color	White
Head Type	Semi-Compact
Plant Color	Purple
Plant Height (in)	72-78
Head Exertion (in)	7-8
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Very Tolerant
Greenbug Resistance (C)	Moderately Tolerant
Greenbug Resistance (E)	Moderately Tolerant
Maize Dwarf Mosaic	Tolerant
Head Smut	Moderately Tolerant
Downey Mildew	Moderately Tolerant
Fusarium	Tolerant
Charcoal Rot	Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	8
SEEDLING VIGOR	8
COLD SOIL VIGOR	8

DROUGHT TOLERANCE	7
LODGING RESISTANCE	7
WEATHERING RESISTANCE	8

W-7721

- » Highest yield potential in product lineup
- » Very uniform with great eye appeal
- » Highly tolerant to Sugar Cane Aphids
- » Good disease resistance

Management Tips

- ✓ Should be planted in high rainfall or irrigated conditions
- ✓ Medium tall hybrid that should be used where high top end yields are expected
- ✓ Use where Sugar Cane Aphids are a concern

PLANT CHARACTERISTICS

Area of Adaptation	1-5
Relative Maturity	Medium-Full
Days to Mid-Bloom	68-71
Days to Maturity	105-115
Grain Color	Red
Head Type	Semi-Compact
Plant Color	Purple
Plant Height (in)	54-58
Head Exertion (in)	4-8
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Very Tolerant
Greenbug Resistance (C)	Moderately Tolerant
Greenbug Resistance (E)	-
Maize Dwarf Mosaic	Highly Tolerant
Head Smut	Highly Tolerant
Downey Mildew	Tolerant
Fusarium	-
Charcoal Rot	Highly Resistant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	9	DROUGHT TOLERANCE	7
SEEDLING VIGOR	8	LODGING RESISTANCE	9
		WEATHERING RESISTANCE	7

W-902W

- » Tremendously high yield potential
- » White, food grade grain sorghum
- » Outstanding grain quality
- » High weathering resistance even for a white grain

MODERATE RESISTANCE

Management Tips

- ✓ Should be planted in high rainfall or irrigated conditions
- ✓ Be careful of late planting in areas where early frosts are a concern

PLANT CHARACTERISTICS

Area of Adaptation	2-4
Relative Maturity	Full
Days to Mid-Bloom	72-78
Days to Maturity	115-120
Grain Color	White
Head Type	Semi-Compact
Plant Color	Tan
Plant Height (in)	48-54
Head Exertion (in)	4-6
Staygreen	Yes

DISEASE RESISTANCE

Sugar Cane Aphid Tolerance	Moderately Tolerant
Greenbug Resistance (C)	Tolerant
Greenbug Resistance (E)	Susceptible
Maize Dwarf Mosaic	Highly Tolerant
Head Smut	Moderately Tolerant
Downey Mildew	Moderately Tolerant
Fusarium	Highly Tolerant
Charcoal Rot	Tolerant

Ratings: 1 = Poor 9 = Excellent

UNIFORMITY	8	DROUGHT TOLERANCE	7
SEEDLING VIGOR	8	LODGING RESISTANCE	8
COLD SOIL VIGOR	8	WEATHERING RESISTANCE	8
